Disclosure Statement

eTXChange Version 7.1 from eTransX, Inc. is certified both for Ambulatory and Inpatient setting for the following 2014 module criteria:

Ambulatory:	170.314 (f)(2, 3); (g)(4)
Inpatient:	170.314 (b)(1, 2, 6); (f)(2, 4); (g)(1, 4)

The above certified product does not require any other external software to run other than SQL Server. For the purposes of achieving MU, an EP, EH or CAH may be expected to pay a separate "one-time" fee for customizing the transmission interface development and configuration necessary for a state reporting agency. In addition, eTransX charges a "one-time" and an annual fee to integrate and maintain its certified EHR technology with a hospital's other certified EHR Modules or a health information exchange organization.
